www.health.gov.au/tobacco

This flipchart has been developed to assist general practitioners and their practice staff to more effectively identify smokers and assist them to stop smoking.

National Tobacco Strategy 2004-2009

www.health.gov.au/internet/wcms/publishing.nsf/Content/health-publth-strateg-drugs-tobacco-policy.htm

A new five-year National Tobacco Strategy was endorsed by the Ministerial Council on Drug Strategy in November 2004. The directional approach of the new National Tobacco Strategy 2004-2009 builds on existing tobacco control efforts and achievements by State and Territory Governments and the Australian Government. The National Tobacco Strategy is a long-term framework for national tobacco control activity under which all jurisdictions and the community may dedicate resources.

Development Bulletin No 54 March 2001 – Tobacco and Development: Critical Issues for the 21st Century (Available as digital file only – no hard copies)

www.health.gov.au/tobacco

This bulletin is produced by the Development Studies Network Ltd - a not-for-profit organisation that provides information and discussion on social and economic development. This issue, which has been produced with the financial assistance of the Australian Government Department of Health and Ageing, focuses on tobacco, and its impact on social and economic development, particularly on countries within our region. The issue also includes cost-benefit analyses, discussion on global legislation and the impact of globalisation and free trade.

Cigarette Smoking Among Women in Australia (Available as digital file only – no hard copies)

Tobacco Advertising Prohibition Act 1992 – Issues Paper August 2003 (Available as digital file only – no hard copies)

www.health.gov.au/tobacco

This issues paper is the first step in the review of the *Tobacco Advertising Prohibition Act 1992* (the Act). The purpose of the issues paper was to seek community views on the continuing relevance of the Act and suggestions for change, including the control of tobacco advertising in Australia in relation to other tobacco control measures.

Tobacco Advertising Prohibition Act 1992 Handbook

TOB2

www.health.gov.au/tobacco

The handbook provides a plain English guide to the *Tobacco Advertising Prohibition Act 1992*. Primarily the handbook provides an overview of the Act, its objectives and the way it meets those objectives.

Review of Health Warnings on Tobacco Products in Australia – Discussion Paper

TOB3

www.health.gov.au/tobacco

The *Review of Health Warnings on Tobacco Products in Australia – Discussion Paper* is one of the first steps in the development of revised health warnings for tobacco products currently prescribed under the *Trade Practices Consumer Product Information Standards (Tobacco) Regulations*. The discussion paper is designed to seek views from interested individuals and organisations within the community in the development of new health warnings.

Developmental Research for New Australian Health Warnings on Tobacco Products – Stage 1

www.health.gov.au/tobacco

The Australian Government Department of Health and Ageing commissioned Elliott & Shanahan Research to undertake developmental research for new Australian health warnings on tobacco products. This report details the results of Stage 1 of a two stage research project designed to assess and evaluate target audience reaction to proposed new health warnings, explanatory messages and graphic options to be used on tobacco products.

Developmental Research for New Australian Health Warnings on Tobacco Products Stage 2 (and Appendix – Cigarette Warning Labels)

www.health.gov.au/tobacco

The Australian Government Department of Health and Ageing commissioned Elliott & Shanahan Research to undertake further developmental research, based on the finding of the Stage 1 research, for new Australian health warnings on tobacco products. This report details the results of Stage 2 of a two stage research project designed to assess and evaluate target audience reaction to proposed new health warnings, explanatory messages and graphic options to be used on tobacco products.

Incidental Smoking in the Media Study

www.health.gov.au/tobacco

This report by Curtin University provides contemporary Australian data on the depiction of smoking in the media including analysis of national and State news media, magazines, films, popular music including videos and radio, and Internet sites.

Reduced-Ignition Propensity Cigarettes – A Review of Policy Relevant Information

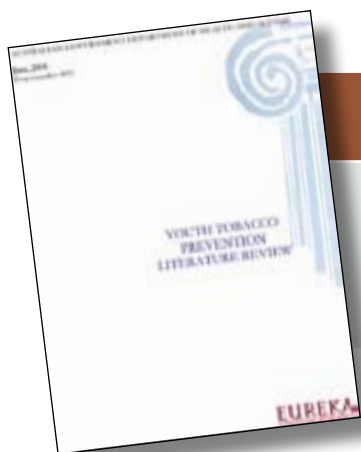

www.health.gov.au/tobacco

This report examines policy issues regarding reduced-ignition propensity cigarettes, which are cigarettes that have the reduced propensity to start fires, such as domestic house fires and bush fires. The report provides the evidence base around the incidence of cigarette-caused fires, the technologies that could reduce the ignition propensity of cigarettes, the policy position adopted by cigarette manufacturers, costs associated with smokers' materials and cigarette-caused fires and the standards adopted by other jurisdictions.

Licensing of Tobacco Retailers and Wholesalers – Desirability and Best Practice Arrangements

www.health.gov.au/tobacco

This report by the Allen Consulting Group is intended to be a best practice guide that can be used by States and Territories to inform future policy and legislative development. The report confirms that there is a strong case based on economics and public health benefits for introducing licensing of tobacco retailers, and indicates that best practice involves licensing both wholesalers and retailers.

Youth Tobacco Prevention Literature Review (Available as digital file only – no hard copies)

www.health.gov.au/tobacco

The Department of Health and Ageing commissioned Eureka Strategic Research to undertake an analytical literature review of youth smoking behaviours and attitudes.

Youth Tobacco Prevention Research Project (Available as digital file only – no hard copies)

www.health.gov.au/tobacco

Following the literature review, Eureka Strategic Research conducted qualitative-based research which looked at basic behavioural research to assist the Government better understand the process of tobacco uptake, addiction and cessation among young people. The research included a dedicated component to explore the views of Indigenous young people and parents.

A toolkit of interventions to assist young people to negotiate transitional pathways

TOB31

www.nationaldrugstrategy.gov.au/publications/monographs.htm

This report focuses not just on those interventions which are designed around drug use and prevention, but also considers the broad spectrum of interventions which address risk and protective factors for a range of negative life course outcomes for young people.

The report organises programs within three categories:

- projects with a major focus on learning or skill development such as school-based drug education or policing programs, parenting programs and programs focusing on young people at risk of early school leaving;
- participation programs which include a focus on mentoring programs, sport, arts, leisure and wilderness activities; and
- direct service and treatment programs which focus on multi-modal treatment and rehabilitation programs for those with a high level of need.

This publication will be a useful resource for policy makers, training organisations and for those who work with young people, to assist in setting up and/or evaluating programs that are most likely to have a positive effect on young people.
