

## **Hospital Casemix Protocol 2008-09**

### **Number of separations, average length of stay, patient days and average charges, by AR-DRG version 5.1 Public Hospitals, Private Hospitals and Day Surgeries**

#### **Notes to be read in conjunction with tables**

Figures in the following tables are accurate as at the 25th of March 2010. These figures are subject to change resulting from resubmissions of data by health funds including delayed claims from fund members.

**Confidentiality** - Where there are DRGs with less than 10 separations or fewer than 3 reporting hospitals, all results have been replaced by asterisks ("\*\*\*\*\*") to maintain confidentiality.

**Average charges** - based on all separations where a charge was reported.

**Accommodation charges/benefits** - relates to admitted patient care, refer to private, shared or high dependency accommodation for any Accommodation Type (i.e. advanced surgical, surgical, medical, rehabilitation, obstetrics, and psychiatry). All hospital episodes must have a charge/benefit component relating to accommodation, unless it was bundled, or the hospital billed a procedure-only fee. Therefore, cases such as chemotherapy should either have a charge/benefit component in "bundled" or "accommodation" or "theatre". They should not be reported as "other".

**Bundled charges/benefits** - refer to an aggregate of 2 or more charges billed by the hospital/paid by the insurer, such as case payments by DRG or MBS.

**NICU** means the neonatal intensive care unit of a hospital.

**PICU** means the paediatric intensive care unit of a hospital.

**HDU** means the high dependency unit of a hospital.

**CCU** means the coronary care unit of a hospital. **CCU charges, benefits, days and hours** - excludes ICU, SCN, NICU, PICU and HDU.

**ICU** means the intensive care unit of a hospital. **ICU charges, benefits, days and hours** - includes NICU and PICU; excludes SCN, CCU and HDU.

**Other charges/benefits** – refer to services which cannot be categorised as accommodation, theatre, ICU, prosthesis or bundled. It excludes ex-gratia charges, television, phone calls, extra meals, FED, reversals or journal adjustments.

**SCN** means the special care nursery of a hospital. **SCN charges, benefits, days and hours** - excludes NICU, Intensive Care Unit (ICU), CCU, PICU and High Dependence Unit (HDU).

**Theatre charges/benefits** – refer to a theatre/procedure room/ angiography suite. This applies to theatre charges, benefits and minutes in theatre.

**DRG** means Diagnosis Related Group. AR-DRG version 5.1 refers to version 5.1 of the Australian Refined Diagnosis Related Groups.

**Missing Values and Length of Stay** - Due to the existence of missing values within the collection it is not feasible to average length of stay measures across all separations, instead an episodic average is used. The episodic average determines the mean length of stay by dividing total length of stay by the number of separations containing a valid length of stay value.

**Duplicate Records** - A number of duplicate records have been identified in the HCP collection, where identified they are removed from the collection and excluded from analysis.

#### **Notes to Charges Results**

When comparing average charges from the HCP, two different calculations of the average charge have been used, namely 'Episodic Charges' and 'All Episodes Charges'. Any reference to an average charge will be the 'Episodic Average Charge' unless otherwise stated.

Example

Patient A - Bundled charge = \$1,000

Patient B - Bundled charge = \$700

Patient C - Bundled charge = \$0

Total charges = \$1,700

Total patients = 3

Number of charges = 2

**Episodic Charge' averages** - the average only for where there was a charge recorded.

Total charges / Number of charges > \$1,700 / 2 charges = \$850 average per charge

**All Episodes' averages** - the average for all patients.

Total charges / Total patients > \$1,700 / 3 patients = \$567 average per patient

**HOSPITAL CASEMIX PROTOCOL - 2008-09**
